

We are a world-leading provider of technologically advanced products and consulting services focused on the energy sector

47+
year history

40
people

5
offices: UK, Ireland, Malaysia, Singapore, USA

30
global customers

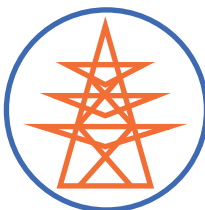

60,000 MW
global references

We deliver innovative solutions to complex energy challenges through a combination of technical problem-solving, advanced design, top quality engineering and operational expertise.

Sectors

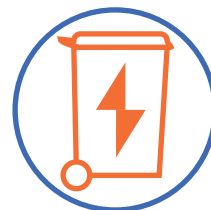

Utility

Biomass

Energy from Waste

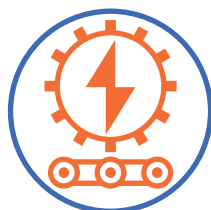

Large Combustion Plant

District Heating Schemes

Package & Process Burners for Industry

Capabilities

Materials Handling | Combustion Optimisation | Emissions Reduction
Carbon Reduction Strategies | Fuel Switching | Coal to Gas Conversions
Biomass Co-Firing | Plant Upgrades | Technical Services Agreements

We are focused on developing original and sustainable solutions to resolve some of the world's most complex combustion and emissions challenges

Energy

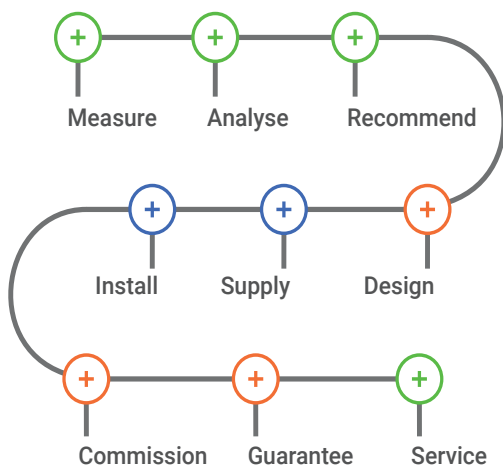

RJM works with leading power producers to help them maintain reliable, cost-effective and flexible generation and also meet tightening emissions regulations on their transition towards net zero.

Industry

RJM enables Large Combustion Plant such as steelworks, glassworks and refineries, as well as smaller, industrial process plants to produce power, steam and hot water as cleanly, efficiently and reliably as possible.

Process

We follow a well-proven procedure that delivers innovative solutions to complex energy challenges, combining technical problem-solving, high-quality design and operational expertise.
